

# “Solution to safer driving..”

## Roadwatch Safety System

National Seating a Commercial Vehicle Group Company introduces the RoadWatch SS (Safety System). RoadWatch SS (RDW-SS) is a vital part of your driving experience. RDW-SS system continuously monitors and shows the actual road surface temperature and outside air temperature while driving at normal highway speeds. RoadWatch SS will accurately sense a one-degree change in road surface in one-tenth of a second.

Why drive with uncertainty of the condition of the road when you can drive with the comfort of the RoadWatch SS.

### Backup Cameras
